PROFILE

BSIT graduate with hands-on experience building responsive web applications across frontend and backend. Experienced with React, JavaScript/TypeScript, REST APIs, and databases, with a strong focus on frontend development.

EDUCATION

Bachelor of Information Technology | 2022-2026

- Xavier University Ateneo -
Cagayan De Oro City

PROJECTS & EXPERIENCE

FULL STACK DEVELOPER

- **UNDERGRADUATE FACULTY CLEARANCE WEB SYSTEM (CAPSTONE PROJECT)**

XAVIER UNIVERSITY ATENEO CAGAYAN DE ORO | 2025 - 2026

KsRA Award-Winning Capstone Project | Responsive Mobile & Desktop Web Application

- Solely developed the frontend for a responsive mobile and desktop web application, designing and implementing reusable React components and all major application pages.
- Implemented responsive UI/UX using React and Tailwind CSS, ensuring consistent functionality and layouts across different screen sizes.
- Assisted with backend and database development, including MySQL integration, RESTful API endpoints, notifications, and activity logging.
- Implemented JWT-based authentication and authorization and contributed to application security measures for protected user access and system functionality.
- Collaborated with the development team using GitHub and Docker for version control, development, and application deployment/testing.
- Collaborated with a real-world client, conducting user interviews and requirements-gathering sessions to understand workflows, identify system needs, and translate feedback into application features and UI improvements.

Technologies: React, JavaScript, Tailwind CSS, MySQL, Docker, Git/GitHub, JWT, Figma, RESTful APIs

Github Repository : <https://github.com/kemsk/BoysenBuddies-FacultyClearance>

INTERNSHIP

• FULL STACK DEVELOPER

MELDCX PHILIPPINE INC. | 2026

- Developed and maintained frontend components and application pages based on UI/UX designs created in Figma, focusing on responsive and reusable interfaces.
- Implemented frontend functionality and collaborated with developers to integrate application features and backend services.
- Contributed to backend authentication and security features, including JWT-based authentication, OTP verification, and Keycloak integration.
- Performed application testing, debugging, and troubleshooting to identify and resolve functional issues.
- Used Docker as part of the development environment and application workflow.
- Participated in Scrum meetings and Agile development processes, collaborating with team members to discuss progress, requirements, and technical issues.

Technologies: React, TypeScript/JavaScript, Figma, Keycloak, JWT, OTP, Docker, Git/GitHub, Tailwind

TEAM LEADER & FULL STACK DEVELOPER

• ACADEMIC STUDENT EVALUATION SYSTEM

SCHOOL OF LAW : XAVIER UNIVERSITY ATENEO CAGAYAN DE ORO | 2025

- Led the GitHub repository and development workflow, coordinating code contributions and project changes across the team.
- Designed the application's UI/UX in Figma and developed the frontend using HTML and CSS.
- Developed both frontend and backend functionality, using Python and MongoDB to manage and process student evaluation data.
- Implemented automated evaluation logic to determine student enrollment eligibility and academic standing, including statuses such as first-strike and dismissal-risk classifications.
- Collaborated directly with the School of Law as the project client, gathering requirements and translating their academic policies and workflows into system functionality.
- Participated in testing and debugging to ensure the evaluation results and system functionality aligned with the client's requirements.

Technologies: HTML, CSS, Python, MongoDB, Figma, Git/GitHub, RESTful APIs, Bootstrap

Github Repository : <https://github.com/farrahApag/SOL-pre-enrollment-system>

TECHNOLOGIES

- **Frontend:** HTML5, CSS3, JavaScript, React, Tailwind CSS, Bootstrap, SEO Fundamentals
- **Design:** Figma, Adobe Photoshop, Responsive UI/UX, Canva
- **Backend:** Node.js, Python, RESTful APIs, Express.js
- **Database:** MySQL, MongoDB
- **Tools:** Git/GitHub, Docker, Visual Code Studio, Varcel
